COUNTRY		

Economic importance of crop to the nation/community ¹	Production season (Wet/Dry/Year round) ²	# Producers	Crop phenology			# Major pest/disease Hectare	importance of	Availability of meteorological data ⁴		
			Growth period	Vegetative period	Reproductive period	Critical period of crop for pest/disease infestation			pest/disease to the crop ³	

¹ Score in the scale of 1 to 5, where 1 is the least important and 5 is very significant important (Attach statistical information and references)

² Define wet/dry season

³ Score in the scale of 1 to 5, where 1 is least important and 5 is highly important

⁴ Attach available meteorological data for the period, number of years and variability (minimum and maximum temperature, Relative humidity, daily and monthly precipitation, leaf wetness and any other data which are weather related affecting pest and disease)

Major pest/disease	Year/time of year infestation	Intensity of infestation ⁵	Problem to be solved with weather related model	Previous experience with the use of model ⁶	Contact Person with e-mail id
					_

Score intensity of infestation in the scale of 1 to 5, where 1 is low and 5 is very severe.

 $^{^{6}}$ Provide documentation/information of model used, if any in the country
